

AD-LIB SCHOLAR

Designed by PearsonLloyd as an addition to the Ad-Lib family, Scholar recognises the changing nature of learning environments. Today the structured formality of learning environments is being replaced by the need for more interactive and flexible spaces, where students move continually from collective to individual settings. Ad-Lib Scholar delivers a comprehensive solution with dynamic flexibility.

Mobility is central to the design of Ad-Lib Scholar. Casters and the swivel mechanism ensure the chair can be moved quickly and efficiently into any required sitting configuration. The addition rotational foldaway tablet is a key element of this flexibility. While the under seat storage tray and drink holder complete the holistic solution.

DIMENSIONS

DESIGN

PearsonLloyd

The London based practice takes a collaborative approach to its work, embracing the restrictions imposed by production, the market and all the other factors that define a brief. Their work is grounded in research and at

the core is an attempt to understand the relationship between a product, its place, and the way people use it. It is this innovative thinking that earned PearsonLloyd a Red Dot Award for the design of Ad-Lib for Senator.

STANDARD FEATURES (*Selected models only)

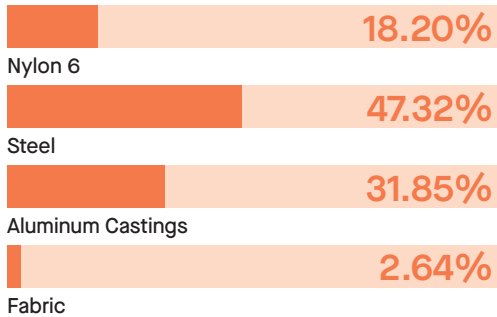

- Tubular Steel support base, incorporating four 2" hard wheel casters and storage tray
- Plastic seat and back frame*
- Plastic or upholstered seat and back*
- Plastic contoured seat and back panel*
- Back frame with integral arms covered in soft touch Plastic*

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

While recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

REDUCE REUSE RECYCLE
