

TALON

Looking at how people work, the Ad-Lib range has evolved and now offers new top shapes and sizes.

With technology at the forefront of the design; power, AV and USB outlets are conveniently located under the desk surface and accessed through an easily removable polished acrylic cable access tray which sits neatly on a cable

tidy porthole. The tables feature an innovative tech knit sock which also acts as cable management when used with an integrated power module.

DIMENSIONS

DESIGN

Senator

Our team of talented in house designers are responsible for creating elegant, innovative furniture designs which not only look beautiful, but minimise the impact on the world around us.

They come from all over the world, but are based in our Design Centre located in a quiet Lancashire village just outside the Ribble Valley. Our dedicated facility is over three floors which include studios, a materials test centre and prototyping lab.

Components are constructed of the following

Recycled Content

Contains up to 65.75% of Recycled Material

Recyclability

The range is 99% recyclable

100%

Environmental information for this range has been based on TAL41DE.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

Reduce Reuse Recycle
