

### LYFT

Lyft is a stool that answers the age old question, is it better to sit or stand. Well, now you can do both. Designed to help productivity and well-being Lyft helps improve posture by relieving stress placed upon the body.

Lyft is the perfect accompaniment to your office task chair. With its rounded base, Lyft offers motion and

mobility and its unique curved seat offers uncompromising comfort and support whether sitting, standing or perching.

This addition to your task chair allows not only greater posture but greater connectivity, use it for impromptu meetings not just prolonged work periods.

### DIMENSIONS

### DESIGN

Sven Von Boetticher, ID AID

ID AID is an independent design studio founded in Stuttgart in 2011. It develops innovative concepts, products, spaces and strategies for national as well as international companies and brands.

A competent team of designers around company founder Sven

von Boetticher ensures space for creative ideas, based on teamwork and an open company culture. Our personal way of designing products and offering brand consultation and strategic planning, generates archetypal product solutions and authentic concepts for product and brand communication.

### MATERIAL CONTENT

Components are constructed of the following

### RECYCLABILITY

The range is 99% recyclable

99%

### SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

#### -Reduce, Reuse and Recycle.

While recycling is the element which

receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.
