

AD-LIB STOOL

With Ad-Lib we set out to redefine the genre of multi-purpose seating, developed with fewer components so that it still achieves the versatility needed to build an amazingly wide range of chairs.

Ad-Lib has been designed to be specified for all multi-purpose seating uses

throughout the corporate environment; meeting, conference, training, light work or retail environments. It would also be applicable in educational and leisure areas.

Design by PearsonLloyd

- EN15373:2007-L2
- GS Certificate

DIMENSIONS

DESIGN

PearsonLloyd

The London based practice takes a collaborative approach to its work, embracing the restrictions imposed by production, the market and all the other factors that define a brief. Their work is grounded in research and at the core is

an attempt to understand the relationship between a product, its place, and the way people use it. It is this innovative thinking that earned PearsonLloyd a Red Dot Award for the design of Ad-Lib for Senator.

SENATOR 3 R'S

Senator is committed to continually improving the sustainability of all environmental aspects within our business.

To meet both international standards and our own environmental targets we apply the three R's principle

-Reduce, Reuse and Recycle.

Whilst recycling is the element which receives the most exposure it is actually the last option available and should never be the prime target in anyone's battle to reduce waste.

It is our duty as individuals and as a company to initially attempt to **Reduce** usage. Then we should look to **Reuse** wherever possible and finally, only after these two processes have been exhausted, should we consider **Recycling**.

Reduce Reuse Recycle
